

Save money with PSE's energy efficiency rebates

For electric customers:

Appliances

Heat pump dryer	\$100
ENERGY STAR® frontload clothes washer	\$50
ENERGY STAR electric dryer	\$25
Pick-up and recycling of old fridges and freezers (Must have been manufactured in 1992 or before.)	Free + \$25

Lighting (instant in-store discount)

Light emitting diode (LED) fixture	Up to \$5
Patio style LED string lights	Up to \$3
T8 LED retrofit bulbs	Up to \$2.50
Recycling of CFL, incandescent, and LED bulbs	Free

Home heating systems

Ductless heat pump conversion (single family homes) (1.0 ton minimum)	\$800
Forced-air furnace to heat pump conversion (single family homes)	\$1,500
Electric resistance to ductless heat pump conversion (manufactured/mobile homes)	\$2,400
Forced-air furnace to heat pump conversion (manufactured/mobile homes)	\$2,400

Water heating systems

Heat pump water heater	\$500
Heat pump water heater (manufactured home)	\$1,000

Weatherization

ENERGY STAR whole house ventilation (single family homes)	Up to \$150 per unit
ENERGY STAR whole house ventilation (manufactured/mobile homes)	Up to \$50 per unit

For natural gas customers:

Home heating systems

ENERGY STAR boiler (95 percent AFUE)	\$350
Forced-air furnace (95 percent AFUE)	\$350
Integrated space and water heating	\$800

Water heating systems

Gas tankless water heater	\$250
Gas storage water heater	\$50

For electric and/or natural gas customers:

Energy-use evaluations

Home energy assessment	Free
------------------------	------

Energy management

Smart thermostat (ENERGY STAR models)	\$75
---------------------------------------	------

Water savings (instant in-store discount)

WaterSense® labeled showerhead	Up to \$10 off
WaterSense faucet aerator	Up to \$2 off

Weatherization (for Single Family homes)

Windows (single-pane replacement)	\$50 per window, up to \$750
Attic insulation (R-11 or less to R-49)	50 percent of the cost, up to \$600
Wall insulation (R0-R13)	50 percent of the cost, up to \$400
Floor insulation (R-11 or less to R-30)	50 percent of the cost, up to \$200
Whole house air sealing	50 percent of the cost, up to \$350
Prescriptive air sealing (attic and/or floor)	50 percent of the cost, up to \$200
Prescriptive duct sealing and insulation (R0-R11)	50 percent of the cost, up to \$400
Duct sealing only	50 percent of the cost, up to \$300

Weatherization (for manufactured/mobile homes)

Attic Insulation	75 percent of the cost, up to \$1,200
Floor insulation	75 percent of the cost, up to \$1,200
Prescriptive duct sealing	\$450
Windows	\$200 per window, up to \$2,000

Applies to existing single-family properties or attached housing with four units or less. Qualifying products must be installed in PSE's service area. Weatherization work must be completed by an independent contractor, pre-authorized by PSE. All are tariffed services and subject to change or termination without prior notice. Additional qualifications apply.

For a complete list of qualifications, visit pse.com/rebates or call a PSE Energy Advisor at 1-800-562-1482, Monday through Friday, 8 a.m. to 5 p.m.

Heating

- Set the thermostat to 68°F or lower when you're at home and awake, and lower 7°F to 10°F when you're asleep or away. Install and properly set a programmable thermostat to make this happen automatically.
- If you have baseboard heaters, turn the thermostat down or off in unoccupied rooms and close the door. Do not do this if you have a furnace or heat pump.
- Have your heating system inspected regularly by a professional to ensure it's operating safely and efficiently.
- Clean or replace your furnace or heat pump filters regularly throughout the heating season. Proper air flow is important to the performance of your heating system. Replace filters as needed.
- Keep areas in front of baseboard and wall heaters, room registers and return air grills clean and clear of furnishings, curtains or other objects that block air flow.

Lighting

- Replace incandescent lighting with ENERGY STAR® qualified LED bulbs and fixtures, particularly in areas you use most. LED bulbs use up to 80 percent less energy than incandescent bulbs while providing the same amount of light.
- LED bulbs last anywhere from 13-25 years longer than incandescent bulbs, making them the ideal choice for hard-to-reach sockets and outdoor lighting.
- Choose the right bulb for each room. LED bulbs come in a variety of shapes, sizes and color tones to suit nearly every household fixture.
- Today's ENERGY STAR qualified bulbs turn on immediately and do not flicker or buzz. LEDs also offer dimmable options.
- When they do finally burn out, properly recycle CFL and other bulbs for free at participating retail locations, household hazardous waste facilities and select PSE offices.

Water heating

- Set the water heater thermostat to 120°F or the "low" setting.
- Find and fix leaks in fixtures and pipes. If your water heater is leaking, replace it.
- Install inexpensive pipe insulation on all exposed hot water pipes and on the first three feet of exposed cold water pipe that is connected to the water heater.
- Wash clothes in cold water and take shorter showers.
- Use the dishwasher rather than hand-washing dishes and don't pre-rinse dishes.
- Install high-efficiency, high-performance showerheads and faucet aerators.

Get additional tips, rebate forms, contractor referrals and more info at pse.com/rebates or call a PSE Energy Advisor at **1-800-562-1482**, Monday through Friday 8 a.m. to 5 p.m.

Typical home energy use:

Weatherization

- Use inexpensive weather stripping and door sweeps to reduce air leaks around entry doors. For a no-cost fix, roll up a bath towel and hold it against the bottom of the door with a weight.
- Fill, patch or caulk holes in floors and ceilings connected to unheated spaces. Often, large holes can be found in closets. Weather strip or temporarily seal access doors or hatches leading to unheated upper floors or attics.
- Check that your floors, walls, duct system and attic ceiling are properly insulated.

Appliances and electronics

- Avoid over drying laundry and clean the lint filter every time you use it to decrease drying time.
- Think about whether you need that second fridge or freezer in the garage or basement. Older units can cost more than \$200 a year to power.
- When cooking, match pots and pans to the right sized burner. Use a microwave oven, rather than your stove, to heat food whenever possible.
- Many electronics draw power even when turned off. Plug items like TVs, DVD players and game consoles into power strips that you can switch off when not in use. Special advanced power strips do this automatically.
